

Resilience against disruptions

Octoplant is the established industry standard for storing, versioning, and comparing entire production environments, providing fast recovery and protection against unwanted changes.

Meet octoplant, the state-of-the-art software designed to boost production resilience in your operations. With advanced technology and robust architecture, octoplant safeguards against undesired changes and minimizes response time to unforeseen disruptions. It delivers the reliability and flexibility required to keep performance at its best.

octoplant ensures data consistency and enhances protection of production output, tailored to the specific needs of individual plants and multi-site operations. With integrated business intelligence, it continuously monitors and evaluates systems, delivering essential insights to maintain daily production security across its eight core elements.

3,000+
customers worldwide

100+
partners across the globe

60%
of the worlds' largest
manufacturers uses octoplant

1,000,000
industrial devices relay
on octoplant everyday

Threat Protection

Take proactive action to prevent security breaches

Assets Safeguarding

Ensure all devices are configured correctly

Device Management

Centrally manage your OT and related IT components

Business Intelligence

Make better decisions

Instant Recovery

Quickly restore the right system configurations

Versioning

Go back in time, track changes, and find configurations that worked

Operational Efficiency

Drive efficient operations

Compliance Management

Fulfill regulatory requirements and streamline production audits

Octoplant stores, versions, and compares all shopfloor devices and documents, providing enhanced management for over 150 common OT and IT-related devices
